

In the Claims:

Claim 1 (canceled) (note new independent Claim 18)

2. (currently amended) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim ~~1~~ 18 in which said upstanding curved portion has several different sectors, with one of said sectors adapted to contact the golfer's leading forearm at one part of the golfer's swing, and another of said sectors contacting the leading forearm at another part of the golfer's swing.

3. (original) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim 2 in which said upstanding curved portion is made up of four separate sectors.

4. (original) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim 3 in which said sectors are separated by bends of pre-established angles, created in said upstanding curved portion.

Claim 5 (canceled) (note new independent Claim 20)

6. (currently amended) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim ~~5~~ 20 in which said generally U-shaped portion has several different sectors, with one of said sectors adapted to contact the golfer's leading forearm at one part

of the golfer's swing, and another of said sectors contacting the leading forearm at another part of the golfer's swing.

7. (original) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim 6 in which said generally U-shaped portion is made up of four separate sectors.

8. (original) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim 7 in which said sectors are separated by bends of pre-established angles, created in said generally U-shaped portion.

Claim 9 (canceled)

10. (currently amended) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim 5 20 in which the part of said generally U-shaped portion that is the farthest distance from said handle portion, measured along said U-shaped portion, resides at an angle between approximately 15° and 35° to the centerline of said shaft.

11. (original) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim 6 in which said club head has a leading edge, with said leading edge residing at a pre-established angle to one of the sectors of said generally U-shaped member.

Claim 12 (canceled) (note new independent Claim 22)

13. (currently amended) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim ~~12~~ 22, in which said generally U-shaped portion serves as a wrist-controlling member, said U-shaped portion having several different sectors, with one of said sectors adapted to contact the leading forearm at one part of the golfer's swing, and another of said sectors adapted to contact the leading forearm during another part of the golfer's swing, so that proper wrist action will be assured.

14. (original) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim 13 in which generally U-shaped portion is made up of four separate sectors.

15. (currently amended) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim ~~12~~ 22 in which the part of said generally U-shaped portion that is the farthest distance from said handle portion, measured along said U-shaped portion, resides at an angle between approximately 15° and 35° to the centerline of said shaft.

16. (currently amended) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim ~~12~~ 22 in which said shaft as well as said U-shaped portion are formed from a single piece of rigid material.

17. (currently amended) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim ~~12~~ 22 in which said shaft as well as said U-shaped portion are separately formed and subsequently attached tightly together in a permanent manner.

18. (new) A dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club, said swing trainer configured to have a shaft, upon one end of which shaft, a club head is mounted, a handle portion affixed to said shaft a spaced distance away from said club head, said handle portion adapted to be grasped by the golfer so that the golfer can swing said swing trainer in the general manner of a golf club, said shaft extending past said handle portion in a direction away from said club head and having an upstanding curved portion, said upstanding curved portion forming a substantially 180° bend, with the outermost end of said upstanding curved portion involving an end member, said end member being spaced away from said shaft, so that when the golfer is grasping said handle portion, a part of said upstanding curved portion may rest against the leading forearm of the golfer, or reside directly above the leading forearm, so that proper wrist action will be assured.

19. (new) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim 18 in which said end member representing the outermost end of said upstanding curved portion is spaced between seven and nine inches away from said shaft.

20. (new) A dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club, said swing trainer configured to have a shaft, upon one end of which, a club head is mounted, a handle portion affixed to said shaft a spaced distance away from said club head, said handle portion adapted to be grasped by the golfer so that the golfer can swing said swing trainer in the general manner of a golf club, said shaft extending past said handle portion in a direction away from said club head and having an upstanding curved portion, said upstanding curved portion being of a generally U-shaped configuration forming a substantially 180° bend, said upstanding curved portion residing in a plane disposed at an angle to the centerline of said shaft, so that when the golfer is grasping said handle portion, a part of said generally U-shaped portion may rest against the leading forearm of the golfer, or directly above the leading forearm, so that proper wrist action will be assured.

21. (new) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim 20 in which said upstanding curved portion has an outermost end that is spaced between seven and nine inches away from said shaft.

22. (new) A dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club, said swing trainer being configured to have a shaft, upon one end of which shaft, a club head is mounted, a handle portion affixed to said shaft a spaced distance away from said club head, said handle portion adapted to be grasped by the golfer with both hands so that the golfer can swing said swing trainer in the general manner of a golf club, said shaft extending past said handle portion in a

direction away from said club head and having a generally U-shaped portion, said generally U-shaped portion being a continuation of said shaft and forming a substantially 180° bend, which generally U-shaped portion is disposed at an angle to the centerline of said shaft, so that when the golfer is grasping said handle portion, a part of said generally U-shaped portion may rest against the leading forearm of the golfer, or reside directly above the leading forearm, such that proper wrist action will be assured.

23. (new) The dynamic golf swing trainer assuring proper wrist and club face positions throughout the swing of a golf club as recited in Claim 22 in which said upstanding curved portion has an outermost end, which is spaced between seven and nine inches away from said shaft.
